Coral LLC Receives Exclusive Worldwide Rights to Market Coral Calcium and Oyster Shell Calcium from Prestigious Mines in Dominican Republic

INCLINE VILLAGE, NV (May 10, 2010) -- Coral LLC, the largest supplier of above-sea, Eco-Safe coral calcium, recently received exclusive rights from Dominican Republic-based Industrial Supply Import CxA (ISI) to market coral and oyster shell calcium derived from ISI's prestigious calcium mine, located in the Baharuco area, near the town of la Descubierta of the Dominican Republic.

ISI's mining concessions offer one of the purest coral deposits in the world (98-99.5% pure), with deposits including coral calcium and oyster shell calcium. Both forms will be marketed by Nevada-based Coral LLC, allowing the company to expand its footprint worldwide as a major supplier of bulk calcium for the health supplements, water filtration and other industries.

Prior to the recent strategic partnership with ISI, Coral LLC was solely dedicated to the sale of coral calcium from different origins. ISI recently attained sole mining rights to the entire Baharuco region, with rich coral deposits providing an estimated 420 million kg of calcium available per year.

"We are thrilled that ISI has granted us this opportunity from this extraordinary mine," said Clint DeWitt, president of Coral LLC. "This agreement gives us the opportunity to expand from a coral focus into the oyster shell market as well. The calcium from this particular region is some of the purest available, and through ISI we have more ability to offer the tightest custom particle size specification."

Coral LLC, the leading brand of above sea coral minerals, is the original coral calcium company in the U.S. The company is located at 38 Diamondback Way, Mound House, NV. To learn more about Coral LLC and the complete line of products, visit www.coralcalcium.com or email Alberto Galdamez at Alberto@coralcalcium.com.
