FOR IMMEDIATE RELEASE

**Coral LLC® Daily Vitamin D3 Delivers “Sunshine Vitamin”
Plus Bio-Available Coral Calcium and More**
Coral sourcing naturally provides calcium and 73 additional minerals

CARSON CITY, NV (September 2, 2015) – With as much as [75 percent](#) of the population considered Vitamin D deficient, it’s safe to say most people should start warming up to the idea of a daily “sunshine supplement.”

Sourced from above-sea EcoSafe™ coral, Coral LLC [Daily Vitamin D3](#) delivers with not only an impressive dose of 5,000 IUs of D3, but also 100 mg of bio-available coral calcium, magnesium and 72 other minerals. Responsible for enhancing this beneficial supplement with 10 percent of the recommended daily allowance of calcium.

“Vitamin D is vital to strong bones, teeth, a healthy mood and a robust immune system necessary to ward off disease, yet sun exposure concerns, geographic limitations and a lack of foods containing this beneficial vitamin keep deficiencies on high,” said Jason DeWitt, managing partner of Coral LLC. “Our Daily Vitamin D3 exceeds the daily value of D, and because of its unique coral sourcing, provides a host of other essential minerals complementary to great health.”

Coral LLC Coral Daily Vitamin D3 is available in small, easy-to-swallow veggie capsules. MSRP: \$18.95 (100 capsules). Visit www.coralcalcium.com to purchase or locate a nearby retailer.

Coral LLC, the leading brand of coral minerals, is the original coral calcium mineral company in the U.S., using only EcoSafe™ above-sea coral in its products. The company is located at 5576 Bighorn Drive, Carson City, NV.
